

BUSINESS INNOVATION MINDSET

Learn Innovation Strategies

27-29 July 2015 (3-day Session)

An innovation programme to equip technology professionals with Business Innovation skills...

PIKOM Training Centre, Empire Damansara**

The National ICT Association of Malaysia (PIKOM) in collaboration with Business Technovise International (BTI) is pleased to invite you to attend the *Business Innovation Mindset Course (BIM)*, the next level of competencies and performance for technology professionals. As the world of business continues to change ever so rapidly, technology professionals no longer can fence themselves with just technical knowledge but must join your business peers in redefining the very business you are in.

This 3-day class provides the perspective and skills needed to make innovation work in your organisation, in particular business model innovation. Based on the most widely used and visually effective business model canvas, you will learn how to use a new, holistic lens to understand, define and more importantly redefine your organisation's business.

This is the skill that will earn you a place at the strategy table and set you apart from the others.

This course is for the technology professional and business executive who has to look at new business opportunities and initiatives. The discussions in class will touch on specific topics impacting technology professionals who are expected to make contributions to business, either with ideas or even actual business results.

Come join your peers from the industry to move to the next level in your career!

Initiated by PCC: PIKOM CIO Chapter (PCC) is a chapter of PIKOM comprising the Chief Information Officers of major corporations in Malaysia formed to extend the "Voice of the ICT Industry" to the end-user community. The PCC has identified the development of ICT professionals in Malaysia among the many initiatives it will champion.

- Certified Consultant and Facilitator in the Practice of Knowledge Management, *JT Frank Academy*, 2007
- Bachelor of Computer Science (First Class Honours), *Universiti Sains Malaysia*, 1987

About the Programme

An innovation programme to equip technology professionals with business innovation skills

What is the Programme about?

As the world of business continues to change ever so rapidly, technology professionals no longer can fence themselves with just technical knowledge but must join your business peers in redefining the very business you are in.

This 3-day class provides the perspective and skills needed to make innovation work in your organisation, in particular business model innovation. Based on the most widely used and visually effective business model canvas, you will learn how to use a new, holistic lens to understand, define and – more importantly – redefine your organisation's business.

This is the skill that will earn you a place at the strategy table and set you apart from the others.

Who is the Programme for?

This course is for the technology professional and business executive who has to look at new business opportunities and initiatives. The discussions in class will touch on specific topics impacting technology professionals who are expected to make contributions to business, either with ideas or even actual business results.

How will the Programme be delivered?

This is a workshop where participants will be required to immediately apply what they learn on the business challenges that their organisations actually face.

Among the questions that will be discussed are:

- Reflection: *What is the current level of innovation?*
- Strategies: *Other than innovation, what other strategies are there?*
- Positioning: *How many different levels of innovation are there?*
- Business Model Canvas: *How do the 9 elements interplay?*
- Value Propositions: *How do effective value propositions look like?*
- Patterns: *What are the common business model families?*
- Evaluation: *What criteria to use on any business model?*
- Design Process: *What's next after the canvas is completed?*
- Validation: *How can one test the business model?*
- Motivation: *At a personal level, are innovators different?*
- Organisation: *How do we sustain an innovation effort?*

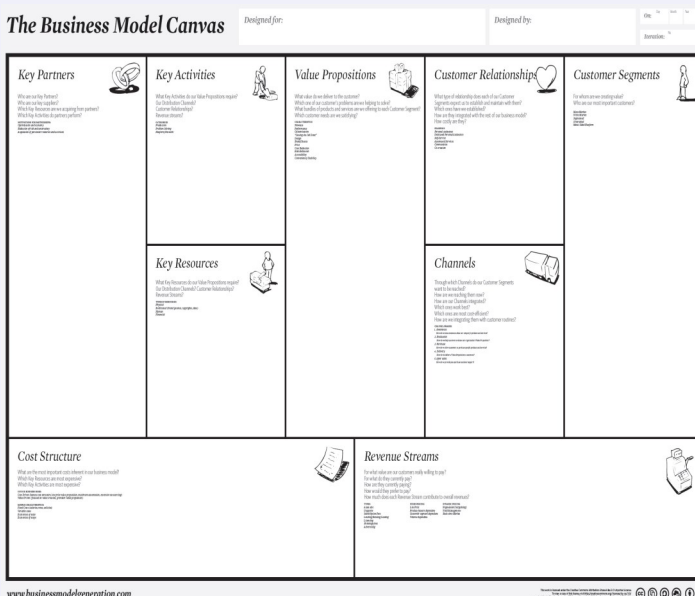

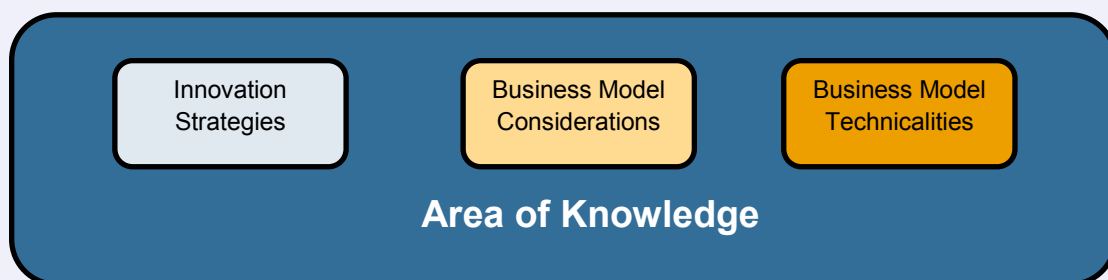

Fig: The Business Model Canvas
