## 5.0 TRANSFORMATION PROGRAMME

To remain successful in the years to come, organizations must incorporate **Transformation 5.0** so that their people are able to rapidly respond to a disruptive industry environment.

**The time to act is NOW**

### Industry 5.0 – Fundamental Shift in the way we Live, Work & Interact

# 10%

**Industry 5.0 is here and now.** Traditionally, organizations which have great leaders are more able to anticipate emerging challenges, more inspiring in leading the organizational changes and more successful in translating strategies into realities. We are living in exponential times where intensifying changes occur at an exponential speed:

- The estimated 4 exabytes of unique information to be generated this year exceed the previous 5,000 years
- Fortune survey found that just 10% of well-planned talent management programmes will prepare the desired **Future 5.0 Leaders**.

While jobs are destroyed, there are instances of larger job creation. The answer needs to be the triumph of hope over fear. How we respond now – the **Line in the Sand** – will baseline our future growth and successes.

### Transformation 4.0 – Are We Ready?

**Malaysia 5.0 ecosystem**, in the context of IOR 5.0, Asia 5.0 & World 5.0, must respond to the megatrends of futuristic digital transformation which are causing profound shifts across all industries. Accelerated effort is required, since most companies are estimated to be at **Industry 2.5/3.0**, to focus on bridging the gap, leveraging on the unknown and yet constantly emerging and meaningful exponential technologies.

Industrial companies are transforming into fully digital enterprises, utilising big data, reducing costs on product development and placing massive emphasis on customer integration into industrial digital ecosystems (**Digital FTZ**).

Customers want a unique experience, forcing businesses to understand their individual pains and tailor products/services specific to what they need.

Successful businesses anticipate change, develop bespoke digital products in the **Digital Factory** with agility and maximise their business growth.

### Leadership 5.0 – Quo Vadis

**Immense Leadership Impact** especially on digital readiness and competencies of leaders. Being digitally sophisticated means having:

- digital IQ**, agility/mobility leadership and culture
- data sciences
- innovative, customer-centric & personalized / individualized business models & collaboration (customer-specific adaptation).

# 5% 33% 500B 1T

Working in highly vertical-horizontal networked ways, with high risks/high rewards outcome, **Industry 5.0 Leaders** need to:

- Understand & leverage on big data and analytics (**learning & acquiring intelligence**)
- Incorporate IoT experience (**multitude of integrated channels/devices to communicate & interact**)
- Leverage on dynamic mobile devices (**natural effective direct information exchanges**)
- Focus on **strategic value creation** (leveraging on automation/robotics/additive manufacturing to work for you, thus enabling teams and organizations to think more strategically)
- Adopt **quick-to-market, cost-effective** cloud usage (use cloud-based secured solutions).

With Talent Readiness less than 5%, and Organization Advanced Preparation less than 33% in a **Digital Economy** of US\$500B Annual Digital Revenue and almost US\$1T Annual Industrial-sector Digital Technology Investment, **Leadership 5.0** readies the employees to drive the required organisational change by changing mindset, and harnessing diversity to achieve superior performance.
