HUMAN RESOURCES

15-17 May 2023, The African Leadership Centre, Quatre Bornes, Mauritius

Team SYNthesis (Mauritius & Africa) Ltd is pleased to invite you to attend an intensive **Resources Management Masterclass** on 15-17 May 2023 at The African Leadership Centre, Quatre Bornes

In the ancient times, when money and machinery did not even exist, a very important resource that worked was "Human". Since then, till today, nothing is able to triumph or replace significance and importance of "Human" as a resource

An organizational workforce also consists of humans which is indeed indispensable. Organizations cannot work without workforces. As we all know, each organization performs a variety of functions for its identity and viability in the market. Strategizing, Production, Accounts, Sales or Marketing, every function requires people to be actively present in it. Needless to say, all the organizations in the world are running because there is a resource called "Resource". These Resources in organizations are well known as "Employees" or "Talent". Undoubtedly, Resources or the Employees are the backbone of any organization.

Resource Management is a function that a team of people perform. These people work as Human Resource Executives or Managers and take care of all the employee related functions like Recruitment, Selection, Training, Development, Compensation, Behavior Management, Retirement and also Termination. Precisely, the entire tenure of an employee in an organization is managed by the HR Team. The major goal of this team is to maximize profit by effective utilization of employees.

The HR of any organization acquires the employees (talent) from the market, train them as per the organizational need and then utilize them optimally for maximizing the returns. If an employee is well trained for carrying out the work in a best possible manner, it can turn out to be the wisest investment done by the company. Training keeps the employees motivated as it helps in upgrading their skills which comes handy in future and also keeps them from losing track. The company provides them training because they know that motivated and talented employees are very crucial for the success of the organization.

This highly interactive and intensive training Masterclass provides attendees with the latest practices, tools and techniques. Our format combines real-world practical case study examples, hypothetical scenarios, group exercises and tutorial style presentations with a focus on collaborative and interactive learning, including 1-1 reviews.

At the end of this Masterclass, the participants will not only know of Plan Time Management, Plan Schedule Management, Define Activities, Sequence Activities, Estimate Activity Resource, Estimate Activity Durations, Develop Schedule & Control Schedule but will also acquire Masterclass best practices & leadership techniques to **make on-Time Deliveries a reality**.

Target Audience:

This course aims at empowering the Program managers, Project managers, Operations managers, Senior Engineers, Team Leaders, managers and others who want to apply best practices for **Quality Management**. This is the sixth of 10-part knowledge areas to develop high performance teams that can drive initiatives to successful completion and obtain the desired organization outcome. **Certified PMs will find the missing links in their PPM practices and relish its inherent challenges.**

The course is very demanding, inevitably it will force the participants out of their comfort zone in order to climb the next S-curve. All participants **should have** a laptop (with **WiFi Connections**) in order to take part in the exercises and read the course notes provided in PDF format.
