Industry 5.0 (**i5.0**) humanizes technologies and promotes massive personalization: human technology where human design meets human needs, recognizing that both digital advancements and the human insight/innovation/creativity are equally important (i.e. human component at the start and end of the automation process).

■ Benefits of Workshop

- ❖ Better customer experience (Cx) & massive personalization (faster and cheaper customized products, increasing customer retention and satisfaction) in healthcare, retail products, etc
- ❖ Massive upskilling investment in highly skilled jobs to offset the automation losses (mundane tasks to AI & robots)
