Risk Management & Project's Outcome Business Success

Risk management is an important part of planning for businesses, designed to reduce or eliminate the risk of certain kinds of events happening or having an impact on the business. **Project Risk Management (Project RM)**, accordingly, is part of project planning to **reduce or eliminate** the events that could derail the program/project from delivering the **desired benefits realization**. **Risk comes from not knowing what you're doing, Warren Buffet.**

Positive vs Negative Risks. Primary vs Secondary Risks. Qualitative vs Quantitative Analysis. Cost of Risk, Contingency Reserve, Management Reserve. A process for *planning, identifying, assessing, prioritizing, mitigating and controlling risks* of different categories, the risk management best practices seek to minimize or eliminate the impact of negative events. Generally, it must cover *program/project-specific, people, physical and financial assets*. **Even a correct decision is wrong when it was taken too late, Lee Iacocca.**

There are many different **types of risk** that risk management plans can mitigate. Technical risks, Project Management (scope, time, cost, quality, resources) risks, Dependency risks, External risks, Organizational risks, Contractual risks. There are as many different types of **strategies** for managing risk as there are types of risks: **Avoid, Transfer, Mitigate, Accept**. **Risk is like fire: If controlled it will help you; if uncontrolled it will rise up and destroy you, Theodore Roosevelt.**

Benefits of Project Risk Management

Project RM Masterclass emphasizes a structured approach to **managing risk** and developing a **culture of positive risk management** focusing on the key concepts of *minimising loss, maximising opportunity and preparing for uncertainty*. Practical sessions comprise the activities and actions taken to ensure that a project is **conscious** of the risks it faces, makes **informed decisions** in managing these risks, and identifies and **harnesses potential opportunities** (improved accountability & compliance outcomes, improved stakeholder relationships and confidence, the development of a learning culture, improved financial management and performance, better resource allocation, reduction in the potential for litigation). **People who don't take risks generally make about two big mistakes a year. People who do take risks generally make about two big mistakes a year, Peter Drucker.**
